The ignorance that is in us no more hinders the knowledge that is in others, than the blindneſs of a mole is an argument againſt the *quickſightedneſs* of an eagle. *Locke.*

QUICKSI'LVER. *n. ſ.* [*quick* and *ſilver*; *argentum vivum*, Latin.] *Quickſilver*, called mercury by the chymiſts, is a naturally fluid mineral, and the heavieſt of all known bodies next to gold, and is the more heavy and fluid, as it is more pure; it is wholly volatile in the fire, and may be driven up in vapour by a degree of heat very little greater than that of boiling water: it is the leaſt tenacious of all bodies, and every ſmaller drop may be again divided by the lighteſt touch into a multitude of others: the ſpecifick gravity of pure mercury is to water as 14020 to 1000, and as it is the heavieſt of all fluids, it is alſo the coldeſt, and when heated the hotteſt: the ancients all eſteemed *quickſilver* a poiſon, nor was it brought into internal uſe till about two hundred and twenty years ago, which was firſt occaſioned by the ſhepherds, who ventured to give it their ſheep to kill worms, and as they received no hurt by it, it was ſoon concluded, that men might take it ſafely: in time, the diggers in the mines, when they found it crude, ſwallowed it in vaſt quantities, in order to ſell it privately, when they had voided it by ſtool: but the miners ſeldom follow their occupation above three or four years, and the artificers, who have much dealing in it, are generally ſeized with paralytick diſorders. *Hill's Materia Medica.*

Mercury is very improperly called a metal, for though it has weight and ſimilarity of parts, it is neither diſſolvable by fire, malleable nor fixed: it ſeems to conſtitute a particular claſs of foſſils, and is rather the mother or baſis of all metals, than a metal itſelf: mercury is of conſiderable uſe in gilding, making looking-glaſſes, in refining gold, and various other mechanical operations beſides medicine. *Chambers.*

Cinnabar maketh a beautiful purple like unto a red roſe; the beſt was wont to be made in Libia of brimſtone and *quickſilver* burnt. *Peacham on Drawing.*

Pleaſures are few, and fewer we enjoy;

What is it, but rank poiſon in your veins. *Young.*

Metal is more difficult to poliſh than glaſs, and is afterwards very apt to be ſpoiled by tarniſhing, and reflects not ſo much light as glaſs *quickſilvered* over does: I would propound to uſe inſtead of the metal a glaſs ground concave on the foreſide, and as much convex on the backſide, and *quickſilvered* over on the convex ſide. *Newton's Opticks.*

S.

S Has in Engliſh the ſame hiſſing ſound as in other languages, and unhappily prevails in ſo many of our words that it produces in the ear of a foreigner a continued ſibilation.

In the beginning of words it has invariably its natural and genuine ſound: in the middle it is ſometimes uttered with a ſtronger appulſe of the tongue to the palate, like *z*; as *roſe*, *roſeate*, *roſy*, *oſier*, *noſel*, *reſident*, *buſy*, *buſineſs*. It ſometimes keeps its natural ſound; as *looſe*, *deſignation*; for which I know not whether any rules can be given.

In the end of monoſyllables it is ſometimes *s*, as in *this*; and ſometimes *z*, as in *as*, *has*; and generally where *es* ſtands in verbs for *eth*, as *gives*. It ſeems to be eſtabliſhed as a rule, that no noun ſingular ſhould end with *ſ* ſingle: therefore in words written with diphthongs, and naturally long, an *e* is nevertheleſs added at the end, as *gooſe*, *houſe*; and where the ſyllable is ſhort the *ſ* is doubled, and was once *ſſe*, as *aſs*, anciently *aſſe*; *wilderneſs*, anciently *wilderneſſe*; *diſtreſs*, anciently *diſtreſſe*.

SELF. *pronoun* plur. *ſelves.* [*ſilba*, Gothick; ꞅẏlꝼ, ꞅẏlꝼa, Saxon; *ſelf*, *ſelve*, Dutch.] 1. It's primary ſignification ſeems to be that of an adjective; very; particular; this above others; ſometimes, one's own. 2. It is united both to the perſonal pronouns, and to the neutral pronoun *it*, and is always added when they are uſed reciprocally, or return upon themſelves: as, *I did not hurt* him, *he hurt* himſelf; *the people hiſs* me, *but I clap* myſelf; *thou loveſt* thyſelf, *though the world ſcorns* thee. 3. It is ſometimes uſed emphatically in the nominative caſe: as, *myſelf* will decide it; I *myſelf* will come; *himſelf* ſhall revenge it. This uſe of *ſelf*, thus compounded, without the pronoun perſonal, is chiefly poetical. 4. Compounded with *him*, a pronoun ſubſtantive, *ſelf* is in appearance an adjective: joined to *my*, *thy*, *our*, *your*, pronoun adjectives, it ſeems a ſubſtantive. Even when compounded with *him* it is at laſt found to be a ſubſtantive, by its variation in the plural, contrary to the nature of Engliſh adjectives, as *himſelf*, *themſelves*. 5. *Myſelf*, *himſelf*, *themſelves*, and the reſt, may, contrary to the analogy of *my*, *him*, *them*, be uſed as nominatives. 6. It often adds only emphaſis and force to the pronoun with which it is compounded: as, he did it *himſelf*. 7. It ſignifies the individual, as ſubject to his own contemplation or action. 8. It is much uſed in compoſition, which it is proper to explain by a train of examples. It is to be obſerved, that its compoſition in *Shakeſpeare* is often harſh.
